

Can you draw a page border of native flowers?

- 1. bright blue
- 2. yellow / green
- 3. green
- 4. bright green
- 5. green / yellow
- 6. grey
- 7. orange / red and yellow
- 8. red
- 9. blue

Colour Code

The rainbow lorikeet has a tongue like a bristle brush. Unlike many other parrots, it doesn't eat seeds (in fact, these can be bad for lorikeets). Instead, it uses its tongue to get nectar and pollen from deep inside native flowers. They also feed on fruits and small insects. Rainbow lorikeets build nests in tree hollows.
